

What is claimed is:

1       1. A flexible hair clip and comb combination for styling  
2 and holding all, or sections of hair comprising:

3           means for gathering the upper portion of hair in  
4 position and holding the hair in a desired position; and

5           means for a combing action and holding larger  
6 amounts of hair in place, rigidly connected to said means  
7 for gathering the upper portion of hair and holding the  
8 hair in a desired position.

1       2. The flexible hair clip and comb combination in  
2 accordance with claim 1, wherein said means for gathering into  
3 a closed position and holding the hair in a desired position  
4 comprises a top concaved upper portion.

1       3. The flexible hair clip and comb combination in  
2 accordance with claim 1, wherein said means for a combing  
3 action and holding larger amounts of hair in place comprises a  
4 lower portion.

1           4. The flexible hair clip and comb combination in  
2 accordance with claim 1, wherein said lower portion comprises  
3 a plurality of teeth.

1           5. The flexible hair clip and comb combination in  
2 accordance with claim 1, wherein said lower portion is at  
3 least as long as said upper portion.

1           6. A flexible hair clip and comb combination for styling  
2 and holding all, or sections of hair comprising:

3           an upper, flexible, concaved portion, for holding  
4 hair in a desired position; and

5           a lower, flexible portion, for a combing action and  
6 holding larger amounts of hair in place, hingedly  
7 connected to said upper, concaved, portion, said lower  
8 portion comprising a plurality of teeth.

1           7. The flexible hair clip and comb combination as  
2 recited in claim 6, wherein said lower portion comprises at  
3 least two teeth.

1           7.5. The flexible hair clip and comb combination as  
2       recited in claim 6, wherein said lower portion is at least as  
3       long as said upper portion.

1           8. The flexible hair clip and comb combination as  
2       recited in claim 6, further comprising:

                  a rigid plurality of interior teeth attached to said  
                  upper portion for providing additional hold of gathered  
                  hair in closed position of said hair clip.

1           9. The flexible hair clip and comb combination as  
2       recited in claim 7, further comprising:

3           a rigid plurality of interior teeth attached to said  
4           upper portion for providing additional hold of gathered  
5           hair in closed position of said hair clip.

1           10. The flexible hair clip and comb combination as  
2       recited in claim 6, wherein said top portion can be concaved  
3       open.

1           11. The flexible hair clip and comb combination as  
2       recited in claim 7, wherein said top portion can be concaved  
3       open.

1           12. The flexible hair clip and comb combination as  
2       recited in claim 8, wherein said top portion can be concaved  
3       open.

1           13. The flexible hair clip and comb combination as  
2       recited in claim 9, wherein said top portion can be concaved  
3       open.

1           14. A flexible hair clip and comb combination for  
2 styling and holding all, or sections of hair comprising:  
  
3                       an upper portion, for flexing into a closed position  
4                       and holding hair in a desired position;  
  
5                       a lower portion, for a combing action and holding  
6 larger amounts of hair in place, hingedly connected to  
7 said upper portion, said lower portion being at least as  
8 long as said upper portion;  
  
9                       a plurality of teeth in said lower portion forming a  
10 comb;  
  
11                      a rigid plurality of interior teeth, attached to  
12 said upper portion for providing additional hold of  
13 gathered hair in closed position.
